## PROFESSIONAL EXPERIENCE

### SENIOR CONSULTANT/SOFTWARE ENGINEER

#### CAPGEMINI

1/2020 – PRESENT

**November 2021 – February 2023**

#### Technical Delivery Lead

Description: Managed a team of four developers in a sustainment project managing four web applications for a Premium Cruise Line.

#### Responsibilities:

*Subject Matter Expert:* Demonstrated proficiency in HTML, CSS, JavaScript, TypeScript, and AngularJS to enhance applications by incorporating web accessibility guidelines, ensuring inclusivity and usability for individuals with disabilities. Leveraged the New Relic API to seamlessly integrate data, enabling comprehensive monitoring and analysis of system performance and user behavior.

- *Project Planning:* Successfully drove project planning activities, including user story creation story point estimation, backlog management and sprint planning.
- *Project Delivery:* Played a vital role in the end-to-end workflow of code deployment, including code review, coordinating client reviews, and facilitating handover to QA team.

Facilitated in pushing code to latest and stage environments, monitoring its status using Jenkins and then coordinating with applicable teams when dependency related errors occurred.

**July 2020 – September 2021**

**Business Analyst**

Description: Staff augmentation role for Privacy Legal operations team. Worked alongside attorneys to provide support on delivering privacy policies to brands and tech partners.

Responsibilities:

- Worked closely with technical team on cookie consent requirements and facilitated discussions between brands and tech to implement cookie consent for Age-Appropriate Design code.
- Drafted documentation, presentations, and guidance using Microsoft Tools.
- Worked with legal and business stakeholders to ensure compliance for privacy laws (GDPR, CCPA, LGPD and AADC) by tracking implementation.

**February 2020 – June 2020.**

**Front-end Web Developer**

Description: Part of a team that developed a B2B portal to increase client's distribution of classic movie titles.

Responsibilities:

- Leveraged experience in Javascript and React to learn and develop components in AngularJS
- Set up angular reactive forms that would handle validation and error handling
- Utilized Bootstrap library to configure date picker and typeahead functionality
- Researched and developed solution of exporting data from node library Ag-Grid to a user's cellular device.
