SUMMARY

Full Stack Web Developer and graduate from UC San Diego Extension Bootcamp with a certificate in web development. With a Bachelor of Arts in Political Science, she has utilized her analytical and problem solving capabilities to always research and find solutions to build responsive applications using NodeJS, HTML, CSS, Javascript, MySQL and ReactJS. Currently looking for opportunities to expand her knowledge in web development while also pursuing her entrepreneurial goals.

TECHNICAL SKILLS

Languages: HTML, CSS, Javascript
JavaScript Frameworks: NodeJS, ExpressJS, and ReactJS, JQuery
Frameworks: Bulma.io, Materialize, Material-UI, Bootstrap
Other Applications and technical skills: MySQL, MongoDB, Firebase, Handlebars

PROJECTS

Meal Of Fortune | https://github.com/katvengo/project-1 |**https://katvengo.github.io/project-1/**
Collaborated with students to design a restaurant finder app using Yelp API, by implementing ajax and manipulating the DOM with Javascript and JQuery.

CongreGeek | https://github.com/katvengo/projectGeek | **https://congregeek.herokuapp.com/**
This is a site for geeks and nerds to come together or 'congregate' that was built with four other students. I worked primarily on the back-end, starting up the server using Javascript, Node.js and Express. I contributed by creating most of the get and post routes as well as configuring the js files and setting up Passport.js to be able to sign up.

React Google Book Search |https://github.com/katvengo/googlebooksearch|
https://katvengo-googlebooksearch.herokuapp.com/
This is a search engine for google books that brings up a picture and description of the book and allows you to save it for later.
Responsible for all aspects of this project, including the design and implementation.
Created using ReactJS.

Scrape Articles |https://github.com/katvengo/scrapearticles |
https://katvengo-scrapearticles.herokuapp.com
This website scrapes articles from AP news and allows the user to favorite articles. It was created with Javascript and NodeJS and used axios and cheerio for the scraping and HandlebarsJs to display the articles.
